

Hengjun Pei

Irvine, CA | 2134359485 | peihengjun1830@gmail.com

EDUCATION

University of California, Irvine

September 2023 - Present

Bachelor of Science, Computer Engineering

Related Courseworks: Discrete Mathematics, Data Structures and Algorithms, Network Analysis I-II, Electronics I-II, Engineering probability, Continuous & Discrete-Time Signals Systems, Organization of Digital Systems & Computers

PROJECT EXPERIENCE

BAPAGO | MySQL, React, Bun, Tailwind CSS, TypeScript, Figma

April 2025 – June 2025

- Collaborated with an 8-member team to develop a restaurant discovery web application featuring an engaging swipeable card interface, integrating the Yelp API to display real-time restaurant details such as name, rating, distance, and hours.
- Managed user data—including account details, login credentials, and favorite restaurant selections—by designing and a MySQL database, and implement JWT-based authentication to ensure secure and persistent user sessions.
- Assisted in frontend by building the profile and login pages using React, Next.js, TypeScript, and Tailwind CSS.

MIRAEJIDO | Nodejs, MongoDB, Tailwind CSS, TypeScript, V0

August 2025

- Collaborated with a 4-member team to develop a website that analyzes resumes (PDF/text) and generates AI-driven professional feedback and outputs an improved version with template if needed.
- Integrated Gemini AI via API and applied prompt engineering to provide professional resume feedback and rephrasing.

MEDIROUTE | HTML, JavaScript

2025 Dream AI Hackathon | Cambridge, MA

June 2025

- Collaborated with a 5-member team to design and partially develop MediRoute, a one-tap app that contacts emergency services and routes users to the nearest appropriately equipped hospital (aimed at easing bed-availability issues in Korea).
- Implements BioGPT for medical question-answering to support faster, clearer emergency transportation decisions.

GOOD-VIBE CLOCK | Arduino IDE, C

BitHacks Hackathon | UCI

April 2025

- Worked with a team to design and build the hardware circuit for a clock that announces the time and a random compliment—generated using the Gemini API—via audio and display when one of two buttons is pressed.

JJOA | Nodejs, MongoDB, JavaScript, CSS

CodingNoona Study | Online

July 2025 – August 2025

- Developed a functional shopping-mall website by completing daily assignments from initially given partial code.

LEADERSHIP & OTHER EXPERIENCE

Computer Technician | Computer Ahnexus, Los Angeles, CA

June 2023 – June 2024

- Diagnosed and resolved hardware and software issues for residential and business clients, including troubleshooting slow systems, repairing physical components, and addressing compatibility problems.
- Actively researched news in both hardware and software to ensure our information remained accurate and up to date.

Team Member | LIKELION US UCI

August 2024 – December 2024

- Gained practical backend programming experience by focusing on Java and Spring Boot development, and collaborating on real-world projects to apply coding knowledge.
- Utilized Git for version control and collaboration, ensuring efficient project workflow and code management.

Club Vice President | International Students Club, Pierce College

June 2023 – December 2023

- Supported internal club operations by helping organize meetings, and assist the president with administrative tasks.
- Assisted international students with their needs and concerns, helping them adjust to a new environment by coordinating engaging events such as Scavenger Hunts and Running Man.

TECHNICAL SKILLS

Tools: MATLAB, Vivado, Git, GitHub, MySQL, MongoDB, Firebase, Microsoft Office, Cursor, Postman

Programming Skills: C++, JavaScript, HTML, Shell Scripting, Verilog, React, Node.js

Operating Systems: macOS, Windows

Languages: Korean (Proficient), Chinese (Proficient), Japanese (Conversational)
